Annex 6

Placements

Placements will be in a GMC approved training practice.

Practices will be paid an agreed (nationally determined FTE) fee for the supervision of doctors on the I&R scheme and this will include for the compilation of educational supervisory reports.

Each placement will have a named GP Educational Supervisor (usually a trainer) and will be for an agreed period.

The nature of I&R placements will vary based on the educational needs of each individual and the local availability of training places.

The placement will commence within 3 months of approval for inclusion onto the scheme by the Performers List Committee. It is anticipated the scheme will last 12 weeks maximum. If it is not completed satisfactorily within 6 months the doctor’s name will be removed from the performers list.
