ST3 Trainees -
If you need some guidance with your Quality Improvement projects you can avail of an EQUIP + session.
This will be "on one" tutoring with either:
  ➢ Dr Nigel Hart
  ➢ Ms Brenda Carson
  ➢ Dr Keith McCollum

If you would like to have a one on one session please book your slot as soon as possible by emailing us gspspecialtytraining.nimdta@hscni.net

Slots for April will be made available in due course.

NIECR—Patient Safety Issues with Electronic Records
The Belfast Trust has provided advice to its staff regarding Potential Safety Issues with Electronic Records and IT Developments:

Ownership of test results—The established view is that person ordering a test is responsible for receipt of its result and acting on it. The recent introduction of the ECR has not altered the general medicolegal responsibility of those ordering tests. Any transfer of responsibility from the ordering team may only take place with dialogue and with the agreement of those who the ordering would wish to pick up the result. The technology to be able to see the result of the test does not obviate the responsibility of the requestor to view and act on it. This applies across both hospital and community practice and the BMA has published a useful document in this regard. If the patient has been discharged from your care, it may be necessary to alert another clinician who has subsequent care of the patient to a result with which you are not familiar. This is of particular importance as length of stay decreases and more follow up takes place in the community.

1. “Medical Error” http://www.nrls.npsa.nhs.uk/resources/?EntryId45=61579

Population of the ECR—The ECR is a “pull system”- it draws its information automatically from existing resources such as LabCentre and PatientCentre. It is important that clinical staff are aware that any errata in a PatientCentre document should be corrected in PatientCentre before the document is locked down and electronically signed as these errata may perpetuate in the ECR if not corrected. This is of particular relevance to the discharge note which includes diagnosis and the prescribing record. It should be noted that subsequent users may be reliant on this record. This issue has been highlighted to the HSC officers responsible for ECR who are aware and looking to improve ECR system.

ATTACHMENTS

To our ST3s who recently completed their CSA, we wish you all good luck for your results!

GMC Deanery Visit
Last month the GMC did a deannery visit with NIMDTA at Antrim Civic Centre. Thank you to all the trainees that attended on the day, we hope you found it an interesting experience.

NIMDTA Refurbishment
February saw a lot of upheaval at the NIMDTA Offices. We are entering the final phase of work next week which will see the meeting and training rooms getting refreshed. Thank you for all your patience while our phone lines were inactive and with any training relocations that have occurred in the interim.

Physical Health of People in Prison
The Northern Ireland Diabetic Eye Screening Programme aims to reduce the risk of sight loss by the early detection and treatment (if needed) of diabetic retinopathy and maculopathy. Research has shown that screening can prevent sight loss in more than 15 people with diabetes in Northern Ireland each year. The Diabetic Eye Screening Programme is commissioned, coordinated and quality assured by the Public Health Agency (PHA), and provided and managed by the Belfast Health and Social Care Trust. Screening is delivered locally in line with national requirements and recommendations. Please see attachment 1 for further reading.

GMC Trainee Reps
Anna O’Kane (ST3) and Aileen Dobbs (ST1) are your NI RCGP trainee reps. Trainees (aka AIFs) are an important part of the College with the AIT Committee frequently being asked for views on initiatives and current events in GP. We are very keen for you to get in touch with anything you think we could help with, if you would like to get involved, or if you have any suggestions for future RCGPNI trainee events.

We would love to hear from you!
