*Please note that some Trusts are undergoing major reconfiguration of services and occasionally services are moved due to unforeseen circumstances. Posts in some programmes may change in location prior to August 2026. As Belfast is the largest Trust likely to be affected, trainees will be in contact by the Medical Education Team as soon as possible if this has an impact on their allocated placements.

For specific programmes within all Trusts, you may be required to travel to various locations within that particular Trust. For more information regarding particular posts, please check the descriptors within the Oriel system

All applicants allocated to NI for Foundation training will have the opportunity to apply for a Specialised Foundation Programme (SFP). These programmes focus on academic research or medical education. Details of how to rank all programmes (FP and SFP) will be provided along with other essential welcome information at the point of allocation to NIFS. For further information, please refer to the NIMDTA Website
