

[Screening undertaken in collaboration with organisations identified at the end of this screening template](#)

Equality, Good Relations and Human Rights Screening

NIMDTA is required to consider the likely equality implications of any policies or decisions. In particular it is asked to consider:

What is the likely impact on equality of opportunity for those affected by this policy, for each of the section 75 equality categories? (minor, major or none)

Are there opportunities to better promote equality of opportunity for people within the Section 75 equality categories?

To what extent is the policy likely to impact on good relations between people of a different religious belief, political opinion or racial group? (minor, major or none)

Are there opportunities to better promote good relations between people of a different religious belief, political opinion or racial group?

Equality, Good Relations and Human Rights SCREENING TEMPLATE

(1) Information about the Policy or Decision

1.1 Title of policy or decision

Equality and Disability Action Plans 2018-2023

1.2 Description of policy or decision

- **what is it trying to achieve? (aims and objectives)**
- **how will this be achieved? (key elements)**
- **what are the key constraints? (for example financial, legislative or other)**

In line with our commitments under Section 75 of the Northern Ireland Act 1998 and our Equality Scheme, the Equality Action Plan 2018-23 identifies a number of key actions to promote equality.

This Disability Action Plan for the period 2018-23 represents our organisation's responsibilities under the Disability Discrimination Act (1995) as amended by the Disability Order 2006. This law requires us to carry out our functions giving due regard to two specific duties. These duties are: to promote positive attitudes towards disabled people and promote the participation by disabled people in public life. The purpose of this action plan is to outline some key actions that we are going to deliver upon to make a difference to people with disabilities including staff and people who use our services, and where relevant, their carers.

In developing the action plan we paid particular attention to:

- Physical disabilities;
- Sensory disabilities;
- Autism Spectrum Disorder; Dyslexia; Cognitive Impairment; Learning disability
- Mental health conditions; and,
- Long-term conditions.

1.3 Main stakeholders affected (internal and external)

For example staff, actual or potential service users, other public sector organisations, voluntary and community groups, trade unions or professional organisations or private sector organisations or others

Those most immediately impacted by these action plans are people who use our services as well as staff and those considering to apply for jobs with us.

Those impacted also ultimately include members of the public.

Junior Doctors and Dentists in our training programmes are affected by our policies and procedures.

1.4 Other policies or decisions with a bearing on this policy or decision

- **what are they?**
- **who owns them?**

Legal requirements under the Human Rights Act 1998 and the European Convention on the Rights of People with Disabilities have a bearing.

(2) Consideration of Equality and Good Relations Issues and Evidence Used

2.1 Data Gathering

What information did you use to inform this equality screening? For example previous consultations, statistics, research, Equality Impact Assessments (EQIAs), complaints. Provide details of how you involved stakeholders, views of colleagues, service users, staff side or other stakeholders.

Tapestry – our Disability Staff Network – were closely involved in the development of actions relating to staff. We engaged with the network quarterly throughout the process.

In the development of the disability action plan we also considered information from a range of previous consultations and activity where issues in relation to disability issues were raised. Especially, we continued to draw on what we learned from our direct engagement with a range of community and voluntary groups representing disability in November 2012, when we developed our previous plans.

We likewise drew on information we gathered when we co-facilitated a HSC-wide consultation event, led by our colleagues in the HSC Trusts, on equality and disability action plans in early 2017.

Other sources of equality data include:

- Census 2011 data.
- Research Reports.
- Reports from various disability organisations for example RNIB, Action on Hearing Loss, Disability Action, Mencap, Carers Northern Ireland. Older Person's Organisations and Children and Young People's Organisations.
- Previous screening and equality impact assessment analysis where equality issues were highlighted.
- Previous work in relation to our Plans.
- Reports and guidance by the Equality Commission on Equality and Disability Action Plans.

We consulted on our plans between October and December 2017. The Consultation Report is available on our website. It outlines all comments received and responses made by the organisation.

2.2 Quantitative Data

Who is affected by the policy or decision? Please provide a statistical profile. Note if policy affects both staff and service users, please provide profile for both.

In the table below, we firstly consider data relevant for our Equality Action Plan, followed by data relevant to the Disability Action Plan.

Category	<i>What is the makeup of the affected group? (%) Are there any issue or problems? For example, a lower uptake that needs to be addressed or greater involvement of a particular group?</i>
Gender	<p>Equality</p> <p>The proportion of females in 2011 was 51.00% (923, 540). The male population was 49.00% (887, 323).</p> <p>GIRES 2014 estimate the number of gender nonconforming employees and service users, based on the information that GIRES assembled for the Home Office and subsequently updated:</p> <ul style="list-style-type: none"> • gender nonconforming to some degree (1%) • likely to seek medical treatment for their condition at some stage (0.2%) • receiving such treatment already (0.03%) • having already undergone transition (0.02%) • having a GRC (0.005%) • likely to begin treatment during the year (0.004%). <p>The number who have sought treatment seems likely to continue growing at 20% per annum or even faster. Few younger people present for treatment despite the fact that most gender variant adults report experiencing the condition from a very early age. Yet, presentation for treatment among youngsters is growing even more rapidly (50% p.a.). Organisations should assume that there may be nearly equal numbers of people transitioning from male to female (trans women) and from female to male (trans men).</p> <p>Applying GIRES figures to NI population n=1,810,900:</p> <ul style="list-style-type: none"> • 18109 people who do not identify with gender assigned to them at birth

- 3622 likely to seek treatment
- 362 have undergone transition
- 91 have a Gender Recognition Certificate

Disability

18% of all people living in private households in NI have some degree of disability. When broken down this means that 21% of adults and 6% of children have a disability.

(Northern Ireland Statistics and Research Agency (NISRA) in its 2007) report on disability indicated that:

There is a higher prevalence of disability among adult females with 23% of females indicating that they had some degree of disability compared with 19% of adult males;

- Male prevalence rates are only higher than female rates amongst the youngest adults (16 to 25): 6% of males compared with 4% of females;
- 8% of boys aged 15 and under were found to have a disability, compared with 4% of girls of the same age.

Around 21% of all people living in private households within Northern Ireland have some degree of disability. Of this figure 12% indicated that they are limited a lot by their disability and 9% indicated that they are limited (by their disability) ‘a little’.

Figures from the Census 2011 show that there is a higher prevalence of females whose activities are ‘limited a lot’ – 13% of females compared to 11% of males due to their disability. However, this is to be expected given their longer life expectancy.

Male	30.52%
Female	69.48%

Age

Equality

Age profile of the NI population (Census 2011):

- **0 – 15 years** – 20.95% (379, 378)
- **16 – 19** – 5.61% (101, 589)
- **20 – 24** – 6.96% (126, 036)
- **25 – 29** – 6.85% (124, 044)

- **30 – 44** – 20.65% (373, 943)
- **45 – 59** – 19.21% 347, 867)
- **60 – 64** – 5.21% (94, 346)
- **65 – 74** – 8.04% (145, 593)
- **75 – 84** – 4.79% (86, 740)
- **85 – 89** – 1.17% (21, 187)
- **90 and over** - 0.56% (10, 141)

Disability

Northern Ireland Statistics and Research Agency (NISRA) in its 2007 report indicated that prevalence of disability increases with age: ranging from 5% among young adults to 67% among those who are very old (85+);

As the population ages, so does the likelihood of having a disability that limits the day to day activities 'a lot'. Figures from 2011 Census of people who are limited a lot by their disability are as follows within the following categories;

Male

- 0-15 – 3%
- 16-44 – 5%
- 45 – 64 – 16%
- 65 and over – 33%

Female

- 0 – 15 – 2%
- 16 – 44 – 5%
- 45 – 64 – 17%
- 65 and over – 38%

Overall there are greater proportions of older people with a disability.

16-24	0

Disability	<p>The term disability covers a wide range and combination of conditions. Multiple needs are evident across sensory, physical and learning disability groups.</p> <p>It is however estimated that between 17 – 21% of our population have a physical disability or sensory impairment, affecting 37% of households.</p> <p>21% adults and 6% children have a disability</p>							

1 in 7 people in Northern Ireland have some form of hearing loss

There are 5,000 sign language users who use British Sign Language (BSL) or Irish Sign Language (ISL)

(Source: Royal National Institute for Deaf People (2005), Deaf People Missing Out on Vital Services, RNID London)

There are 57, 000 blind people or people with significant visual impairment.

In Northern Ireland there are approximately 16,500 persons with a learning disability. An indication of the extent of the disability is reflected in the sub-groupings that are traditionally used; - mild, moderate, severe and profound learning disabilities (Equality Commission NI, 2006).

[http://www.equalityni.org/archive/tempdocs/LiteratureRev\(F\)I.doc](http://www.equalityni.org/archive/tempdocs/LiteratureRev(F)I.doc)

In Northern Ireland mental health needs are 25% higher than the rest of the UK.

Over 10,000 people have the language disorder called aphasia. This usually affects both the understanding and production of spoken and written language.

The 2011 Census marked the first time that the question was included focusing on a request for type of disability to be stated. This question endeavoured to align the responses in so far as possible with the list of activities and disabilities that were used in the Northern Ireland Survey of Activity and Limitation Disability (NISALD) 2009-2007.

The breakdown of the various long - term Disability Issues follows in the table below- as outlined in the 2011 Census.

Type of long – term condition	Percentage of population with condition %
Deafness or partial hearing loss	5.1
Blindness or partial sight loss	1.7
Communication Difficulty	1.6
Mobility of Dexterity Difficulty	11.4
Learning, intellectual, social or behavioural difficulty.	2.2
An emotional, psychological or	5.8

mental health condition	
Long – term pain or discomfort.	10.1
Shortness of breath or difficulty breathing	8.7
Frequent confusion or memory loss	2.0
A chronic illness (such as cancer, HIV, diabetes, heart disease or epilepsy).	6.5
Other condition	5.2
No Condition	68.6

Information on rare diseases provided by NI Rare Diseases Partnership www.nirdp.org.uk / info@nirdp.org.uk suggests 1 in 17 people is likely to be affected by a rare disease at some point in their lives; that is almost 106,000 people in Northern Ireland and approximately the population of Derry/Londonderry. Yet little information on rare disease in Northern Ireland is available for the effective planning and delivery of care and support.

A disease is “rare” if it affects fewer than 5 people per 10,000. There are over 6,000 rare diseases, with others being defined all the time. These range from the very rare to relatively well-recognised conditions such as Motor Neurone Disease, Spina Bifida, or Muscular Dystrophy. While each individual’s condition is rare, these are not minority issues.

No	58.44%
Not assigned	41.56%
Yes	0

Ethnicity	<p>Equality</p> <p>In the general population the 2011 Census indicated that 1.8% (32,000) of the usual resident population belonged to minority ethnic groups.</p> <p>Language (Spoken by those aged 3 and over);</p> <p>English – 96.86% (1, 681, 210) Polish – 1.02%(17, 704)</p>
-----------	--

Lithuanian – 0.36% (6, 249)
Irish (Gaelic) – 0.24% (4, 166)
Portuguese – 0.13% (2, 256)
Slovak – 0.13% (2, 256)
Chinese – 0.13% (2, 256)
Tagalog/Filipino – 0.11% (1, 909)
Latvian – 0.07% (1, 215)
Russian – 0.07% (1, 215)
Hungarian – 0.06% (1, 041)
Other – 0.75% (13, 018)

This has implications for those who are from ethnic minorities or those from different racial backgrounds as they represent a greater proportion of the population since the 2011 census. Consequently assumptions have to be made in relation to an increase in the numbers with dual needs of disability and ethnicity.

(see also qualitative issues in section 2.4)

Figures from the 2011 Census provide the prevalence of disability among the following ethnic groups

Percentage of those whose disability limits their day to day activities a lot

All – 12%
 Irish Traveller – 20%
 White other – 12%
 Chinese – 3%
 Indian – 3%
 Pakistani – 6%
 Bangladeshi – 4%
 Other Asian – 2%

Considering the 2011 Census figures for the ethnic composition of the General Population alongside those of People whose disability limits their day to day activities a lot, it shows that, with the exception of Irish Travellers, black and minority ethnic people are underrepresented amongst those with a disability when compared with their share amongst the general population.

White – 98.21% (1, 778, 449) – 99.40%
Chinese – 0.35% (6, 338) – 0.10%
Irish Traveller – 0.07% (1, 268) – 0.12%
Indian – 0.34% (6, 157) – 0.08%

	<p> Pakistani – 0.06% (1, 087) – 0.03% Bangladeshi – 0.03% (543) – 0.01% Other Asian – 0.28% (5, 070) – 0.03% Black Caribbean – 0.02% (362) – 0.01% Black African – 0.13% (2354) – 0.03% Black Other – 0.05% (905) – 0.02% Mixed – 0.33% (5976) – 0.10% Other – 0.13% (2354) – 0.08% </p> <table border="1" data-bbox="322 566 885 701"> <tr> <td>Not assigned</td> <td>46.75%</td> </tr> <tr> <td>White</td> <td>53.25%</td> </tr> <tr> <td>Indian</td> <td></td> </tr> </table> <p>We recognise that within the category of ‘White’ below a range of nationalities are represented. This is important in the context of specific needs (see section 2.4 below).</p>	Not assigned	46.75%	White	53.25%	Indian

2.3 Qualitative Data in relation to actions in action plan

What are the different needs, experiences and priorities of each of the categories in relation to this policy or decision and what equality issues emerge from this? Note if policy affects both staff and service users, please discuss issues for both.

(1) Equality Action Plan

<p>Action Measure</p>	<p>An identification of different needs, experiences and priorities of any of the equality categories in relation to this action and what equality issues emerge from this.</p> <p>Specify the Section 75 equality categories where there are different needs</p> <p>Note if staff or service users</p>
<p>Carers</p> <p>Promote information for staff who are carers on available policies and measures that might meet their needs; including sign-posting to relevant support organisations.</p>	<p>Multiple needs</p> <p>Young carers are often unrecognised in the workplace.</p> <p>Staff who care for elderly dependants often do not see themselves as a carer.</p> <p>Black and minority ethnic carers often have less family support to draw on. As not all caring takes place in Northern Ireland, some migrant workers may have particular support needs.</p>
<p>Gender Identity</p> <p>Deliver awareness and training initiatives to relevant staff as part of the roll-out of the Gender Identity and Expression Employment Policy.</p>	<p>Multiple needs</p> <p>Gender identities and the expression of gender are highly individual. In the same way, while the process of transitioning will differ between female to male on the one hand and male to female on the other and age may likewise be an important factor, the needs and experience of transitioning will be different from one person to the next.</p>

<p>Training</p> <p>Making a Difference – e-learning</p> <ul style="list-style-type: none"> • Add module to suite of mandatory training for all staff • Deliver on training targets 	
<p>Domestic Violence</p> <p>Undertake awareness raising relating to new support mechanisms (developed by BSO) to support staff with experience of domestic violence.</p>	<p>Multiple needs</p> <p>While most victims of domestic violence are female it is key to recognise that men may also be affected.</p> <p>In a similar way, staff of any age may become a victim.</p> <p>Likewise, the particular vulnerability of people who identify as lesbian, gay or bisexual to domestic violence has been recognised, especially where the individual is not ‘out’ at work. Similar circumstances may apply for victims of domestic violence who identify as non-binary or transgender and have not disclosed their gender identity. In addition, people with a hidden disability may have particular needs.</p> <p>Cultural specific needs in dealing with domestic violence may also important when staff from ethnic minority backgrounds are affected.</p>
<p>Staff Health and Well Being</p>	<p>We realise our staff are dealing with different issues in relation to their health and well being and need support throughout their working lives.</p>

(2) Disability Action Plan

<p>Action Measure</p>	<p>An identification of different needs, experiences and priorities of any of the equality categories in relation to this action and what equality issues emerge from this.</p> <p>Specify the Section 75 equality categories where there are different needs</p> <p>Note if staff or service users</p>
<p>Awareness Days</p> <p>Raise awareness of specific barriers faced by people with disabilities including through linking in with National Awareness Days or Weeks (such as Mind your Health Day)</p>	<p>Multiple needs</p> <p>Prevalence of some disabilities differs between and within some of the equality groupings, such as by age, gender and disability. In a similar way, the experience of barriers may differ, including that of black and minority ethnic people who have a disability, carers, those identifying as gay, lesbian and bisexual, and those identifying as transgender or non-binary.</p>
<p>Placement Scheme</p> <p>Create and promote meaningful placement opportunities for people with disabilities in line with good practice and making use of voluntary expertise in this area.</p>	<p>Though drawn from England, Wales and Scotland the Equality and Human Rights Commission’s first Triennial Review: How Fair is Britain? (2010) mapped progress on equality in Britain for people with protected characteristics. The report identified those issues most urgently in need of resolution and ‘closing the employment gap for disabled people’ was identified as one of the top challenges facing society today.</p> <p>Over one in five adults in Britain today is disabled, yet only half are likely to be in work compared to four-fifths of non-disabled adults. High numbers of disabled</p>

people continue to be excluded from work opportunities that open the door to wealth, worth and wellbeing.

See report by Equality and Human Rights Commission

http://www.equalityhumanrights.com/uploaded_files/Employers/wb_approved_lo.pdf

The shift in recent years towards a high qualification, high skill economy to compete globally, has meant that the employment penalty for those with low or no skills has increased dramatically over time. It is estimated that the employment rate for disabled men without qualifications halved between the mid 1970s to the early 2000s (EHRC, 2010).

Disabled people with qualifications still face barriers to work. At every qualification level, disabled people are more than three times more likely than non-disabled people to be without a job but want to work (Palmer et al, 2005).

Multiple needs

It is likely that unemployment rates will differ depending on the type of disability. Likewise, some people with a disability may face double marginalisation from the labour market, such as depending on their age, sexual orientation, ethnicity or gender identity.

The placement scheme will need to take account of the range of disabilities, to ensure fair access to the scheme.

People with sensory loss may have particular communication needs, both in relation to accessing the scheme (such as accessibility of information materials) and to the day-to-day operation of the placement.

<p>Tapestry</p> <p>Promote and encourage staff to participate in the disability staff network and support the network in the delivery of its action plan.</p>	<p>In the United Kingdom over the last decade there has been a growth of Disabled Employee Networks across all sectors.</p> <p>According to Kate Nash Associates (2009) www.katenashassociates.com Disabled Employee Networks - a practical guide - “this is partly because organisations are becoming more disability and diversity confident but also because disabled people are becoming more comfortable about expressing their needs at work and feel more able to come together in networks of support.</p> <p>Disabled people are also increasingly aware of their economic influence as employees, as customers, as shareholders, as voters and as citizens.</p> <p>To become employers of choice for talented disabled people, organisations need to demonstrate a good track record in accommodating the needs of disabled employees in more sophisticated ways.</p> <p>Multiple needs</p> <p>The staff network needs to be accessible to people with a range of disabilities, including sensory disabilities and learning disabilities who may have particular needs as to the way the network operates.</p> <p>Staff with hidden disabilities, in particular younger staff, may be more reluctant to become involved if they have concerns about negative attitudes and negative implications for their chances of career progression.</p>
<p>Monitoring</p> <p>Encourage staff to declare that they have a disability or care for a</p>	<p>Evidence from our local employment records indicates that the numbers of people declaring that they have a disability is low.</p> <p>This is in keeping with more general evidence which suggests under reporting of disability in employment. A range of issues can cause this, including for example,</p>

<p>person with a disability through awareness raising and providing guidance to staff on the importance of monitoring.</p>	<p>negative attitudes from others, fear of the perceived repercussions, fear of the perceived stigma, less than positive responses from unsympathetic managers or employers or previous negative experiences, lack of understanding of the benefits of doing so and not seeing oneself as having a disability.</p> <p>Drawing on experience from England, the Office for Disability Issues, Experiences and Expectations of Disabled People, July 2008 reported that:</p> <p>“Most barriers to work identified related to the need for support or understanding from a manager or colleagues (for example flexible working hours, flexibility to take time off sick, the need to manage stress or take breaks). Only one in 20 of those asked said that they required support to do the job.”</p> <p>This is evidence that this exists across the range of disabilities but qualitative evidence indicates that this is particularly pertinent in the context of those with mental health issues but also other hidden disabilities.</p> <p>There also needs to be attention given to barriers and fears by staff in declaring disabilities when other factors such as age or ethnicity are also added to the equation.</p> <p>The encouragement on declaration also needs to acknowledge the importance of choice and to ensure disabled employees can be as open about their disability as they want to be either to declare or not.</p>
<p>Training</p> <p>In collaboration with disabled people design, deliver and evaluate training for staff and</p>	<p>People with disabilities face many barriers every day—from physical obstacles in buildings to systemic barriers in employment and civic programs. Yet, often, the most difficult barriers to overcome are attitudes other people carry regarding people with disabilities. Whether born from ignorance, fear, misunderstanding or hate, these attitudes keep people from appreciating and experiencing the full potential a</p>

<p>Board Members on disability equality and disability legislation.</p>	<p>person with a disability can achieve.</p> <p>The most pervasive negative attitude is focusing on a person's disability rather than on an individual's abilities.</p> <p>Training will need to take account therefore of the social model of disability developed by disabled people themselves.</p> <p>Northern Ireland Rare Diseases Partnership (NIRDP) 2013 in responses to previous Equality Action Plans consultations suggested that the revision of Disability Awareness Training should include recognition of specific difficulties encountered by those who have a disability caused by rare disease and their families; including raising awareness of the isolation and stigma associated with rare disease, which impacts strongly on mental health.</p>
<p>Supporting Junior Doctors and Dentist in Training who have a Disability</p>	<p>Doctors and Dentists are often reluctant to seek support when they have a condition or Disability.</p>

2.4 Multiple Identities

Are there any potential impacts of the policy or decision on people with multiple identities? For example; disabled minority ethnic people; disabled women; young Protestant men; and young lesbians, gay and bisexual people.

These have been identified in 2.3 above
 Department of Works and Pensions - carried out research on diversity and disability <http://research.dwp.gov.uk/asd/asd5/summ2003-2004/188summ.pdf>
 People varied as to whether, and how, they felt they had experienced disadvantage resulting from their disability, gender, age, ethnicity or sexuality. The causes of such discrimination were widely assumed to be ignorance, fear and a lack of awareness on the part of those responsible. Reactions were mixed around the concept of 'multiple' disadvantage. It had the most resonance for African, Caribbean and gay and lesbian disabled people. The extent to which people had felt able to overcome disadvantage was attributed to their access to personal, emotional, practical or financial resources.

2.5 Based on the equality issues you identified in 2.2 and 2.3, what changes did you make or do you intend to make in relation to the policy or decision in order to promote equality of opportunity?

<i>In developing the policy or decision what did you do or change to address the equality issues you identified?</i>	<i>What do you intend to do in future to address the equality issues you identified?</i>
<p>Work Placements</p> <ul style="list-style-type: none"> • We work with a range of disability organisations to ensure opportunities are offered to people from a wide spectrum of disabilities, as well as different gender and age groups. • Ensuring that reasonable adjustments are at the heart of placements. <p>Tapestry Disability Staff Network</p> <ul style="list-style-type: none"> • We ensure that the way the 	<p>Carers</p> <ul style="list-style-type: none"> • Use of diverse case studies in materials • Targeted materials (young carers, BME carers, carers of elderly dependants) <p>Gender Identity</p> <ul style="list-style-type: none"> • Training and awareness initiatives to emphasise diversity in their content, including through choice of range of case studies and testimonials (gender,

<p>forum operates allows people with a range of disabilities and from a range of age and ethnic backgrounds to be involved (for example, by providing information in accessible formats and choosing accessible venues).</p> <ul style="list-style-type: none"> • Accessible formats and inclusiveness integrated into Terms of Reference • Strict confidentiality provisions apply 	<p>age)</p> <p>Domestic Violence</p> <ul style="list-style-type: none"> • Support mechanisms and awareness raising materials need to meet the needs of a range of people including different gender and gender identities, ages, ethnic groups, disabilities and sexual orientations • Information materials need to be reflective of the above groups both in the contents and images used <p>Awareness Days</p> <ul style="list-style-type: none"> • Work to feature specific disabilities will take into consideration the need to include a range of age groups, ethnic groups and genders when testimonials and case studies are selected. • Information distributed to staff will take on board the needs of both staff with a particular disability and staff who are carers. • This is important for the selection of disabilities to be featured and the information distributed, including support services in the community signposted to. <p>Work Placements</p> <ul style="list-style-type: none"> • We will work with a range of disability organisations to ensure opportunities are offered to

	<p>people from a wide spectrum of disabilities, as well as different gender and age groups.</p> <ul style="list-style-type: none">• Provider to monitor diversity of participants and consider outreach measures to address under-representation• Provisions for Information materials in accessible formats; provision of interpreters at events.
--	---

2.6 Good Relations

What changes to the policy or decision – if any – or what additional measures would you suggest to ensure that it promotes good relations? (refer to guidance notes for guidance on impact)

Group	Impact	Suggestions
Religion	N/A	
Political Opinion	N/A	
Ethnicity	N/A	

(3) SHOULD THE POLICY OR DECISION BE SUBJECT TO A FULL EQUALITY IMPACT ASSESSMENT?

A full equality impact assessment (EQIA) is usually confined to those policies or decisions considered to have major implications for equality of opportunity.

How would you categorise the impacts of this decision or policy? (refer to guidance notes for guidance on impact)

Please tick:

Major impact	<input type="checkbox"/>
Minor impact	<input checked="" type="checkbox"/>
No further impact	<input type="checkbox"/>

Do you consider that this policy or decision needs to be subjected to a full equality impact assessment?

Please tick:

No	<input type="checkbox"/>
----	--------------------------

Please give reasons for your decisions.

The development of the Equality and Disability Action Plans is a statutory requirement in its own right. Actions identified all relate to good practice and positive action. We consider that the Plans take account of the diverse needs of people identified to date, based on their multiple identities. Review of its implementation through agreed processes and through reports to Senior Management Team, Boards and the Equality Commission will keep this issue live and profiled.

Our plans will be updated every year.

(4) Consideration of Disability Duties

4.1 In what ways does the policy or decision encourage disabled people to participate in public life and what else could you do to do so?

<i>How does the policy or decision currently encourage disabled people to participate in public life?</i>	<i>What else could you do to encourage disabled people to participate in public life?</i>
<p>People with a disability have been involved in the development of the Disability Action Plan – through Tapestry, our Disability Staff Network.</p> <p>We will also engage with them directly in relation to the Equality Action Plan during the consultation period.</p>	

4.2 In what ways does the policy or decision promote positive attitudes towards disabled people and what else could you do to do so?

<i>How does the policy or decision currently promote positive attitudes towards disabled people?</i>	<i>What else could you do to promote positive attitudes towards disabled people?</i>
<p>The plans include key actions relating to staff training and awareness raising.</p>	

(5) Consideration of Human Rights

5.1 Does the policy or decision affect anyone's Human Rights? Complete for each of the articles

ARTICLE	Yes/No
Article 2 – Right to life	No
Article 3 – Right to freedom from torture, inhuman or degrading treatment or punishment	No
Article 4 – Right to freedom from slavery, servitude & forced or compulsory labour	No
Article 5 – Right to liberty & security of person	No
Article 6 – Right to a fair & public trial within a reasonable time	No
Article 7 – Right to freedom from retrospective criminal law & no punishment without law	No
Article 8 – Right to respect for private & family life, home and correspondence.	No
Article 9 – Right to freedom of thought, conscience & religion	No
Article 10 – Right to freedom of expression	No
Article 11 – Right to freedom of assembly & association	No
Article 12 – Right to marry & found a family	No
Article 14 – Prohibition of discrimination in the enjoyment of the convention rights	No
1 st protocol Article 1 – Right to a peaceful enjoyment of possessions & protection of property	No
1 st protocol Article 2 – Right of access to education	No

*If you have answered no to all of the above please move onto to move on to **Question 6** on monitoring*

5.2 If you have answered yes to any of the Articles in 5.1, does the policy or decision interfere with any of these rights? If so, what is the interference and who does it impact upon?

List the Article Number	Interfered with? Yes/No	What is the interference and who does it impact upon?	Does this raise any legal issues?*
			Yes/No

** It is important to speak to your line manager on this and if necessary seek legal opinion to clarify this*

5.3 Outline any actions which could be taken to promote or raise awareness of human rights or to ensure compliance with the legislation in relation to the policy or decision.

Giving cognisance of human rights based approach in the implementation and monitoring arrangements associated with both action plans.

Please note that having completed the screening you will need to ensure that a consultation on the outcome of screening is undertaken, in line with Equality Commission guidance.

Please forward completed template to: equality.unit@hscni.net
