Please note that some Trusts are undergoing major reconfiguration of services and occasionally services are moved due to unforeseen circumstances. Posts in some programmes may change in location prior to August 2026. As Belfast is the largest Trust likely to be affected, trainees will be in contact by the Medical Education Team as soon as possible if this has an impact on their allocated placements.

All applicants allocated to NI for Foundation training will have the opportunity to apply for a Specialised Foundation Programme (SFP). These programmes focus on academic research or medical education. Details of how to rank all programmes (FP and SFP) will be provided along with other essential welcome information at the point of allocation to NIFS. For further information, please refer to the NIMMDTA Website

* Fracture Unit - this post primarily involves the perioperative care of patients in the Trauma and Orthopaedic unit

**During this GIM placement, you will have access to community experience and may also gain experience in the Emergency Department

***Please be advised, having access to your own transport is highly recommended for this post, both for transport to the practice and any travel required as part of this role. There is no out of hours work in this placement. The exact location of the GP practice allocated will be based on preferencing of those available at that time and your PIA computer generated rank.
