The limping child	Acute causes CDH Perthes Disease			
Other				

Notes and Resources

During 2 month placement

All GP Specialty trainees should be able to attend/participate in

1. General Surgical Outpatient Clinics – Seeing the type of patients commonly referred by GPs and their management e.g. cases which have proven difficult for GP to manage, cases which are followed up in secondary care.
2. Acute Paediatric Surgical Admissions— for exposure to acutely unwell children.
3. Case Based Discussion/Case Presentations.
4. Formal Teaching Sessions.

Resources for GP specialty trainees

- RCGP Curriculum: 3.04 Care of Children and Young People
[Children and young people](#)
- Elfh introductory paediatric surgery module 1 <https://www.e-lfh.org.uk/programmes/paediatric-surgery/>
- Tips for GP trainees working in Paediatrics (BJGP January 2011)
- Paediatric surgery for the busy GP-Getting the referral right (Australian Family Physician December 2015; now the AJGP)
- DCH syllabus (Gastroenterology + hepatology; including surgical abdominal conditions)
