General Practice Specialty Training

Study Leave

Guidance on Study Leave for GP Trainees

Version 1.3(August 2023)

Produced by the GP Specialty Training Team

What is Study Leave?

Study leave is defined as leave that allows time, inside or outside of the workplace, for formal learning that meets the requirements of the curriculum and personalised training objectives. This will include regional educational events where the time is protected.

Time for Study Leave is not an automatic entitlement for any trainee. Providers of medical education are reminded of the basic principle that every trainee's educational needs should, where possible, take precedence over purely service needs, as long as patient safety is not compromised. Study leave should therefore be well planned and spread throughout the trainee's training programme.

What is Study Budget?

Study budget is defined as funding to facilitate attendance at approved training events.

There is a clearer definition of how the study budget should be used to support individual professional development.

This includes:

- Covering costs of educational courses/activities that support curriculum attainment
- Agreement that NHS Trusts will cover costs of all mandatory training required to fulfil the trainee's clinical role which are not part of the specialty curriculum
- Guidance on what the study budget will not cover e.g. College examination fees

Gold Guide 9th Edition 2022

The Gold Guide states that access to study leave should form part of the educational contract between Postgraduate Deans and providers of postgraduate medical educational placements.

It highlights the Postgraduate Deans responsibility to ensure less than full time (LTFT) trainees have equitable access to study leave.

Doctors on maternity or paternity leave can access study leave and budget for training events.

The Gold Guide also encourages trainees on career breaks to keep up to date by attending educational events but stipulates that there is no entitlement to study budget for this.

Attending NHS Trust statutory and mandatory training is not counted as study leave.

Study Leave allowance for trainees

GP Trainees are entitled to a maximum of 30 days study leave in a year; the study leave year runs from 1 August to 31 July.

All applications for study leave will be considered on an individual basis, bearing in mind the trainee's priority is to achieve a CCT in General Practice.

The General Practice department reports to the GP Specialty Training Committee on all study leave applications which have been and have not been approved.

We would advise all trainees to ensure that they are covered through their indemnity provider for any study leave opportunities they may undertake.

The time allocation for study leave relates to the number of working days missed over the leave period of 30 days. Weekends should only be counted when they coincide with a duty period.

How many study leave days are provided by the Deanery during the GP Training Programme?

30 (minus days that are used up in the regular teaching and training provided through the local school programmes)

Trainee Grade	Days already used by GP specialty school programme	Days remaining available for Personal use of Study Leave
GPST 1	13 + 1.5*	14.5
GPST 2	22*	8
GPST 3	25*	5

* Number of days may vary

A doctor on a contract of employment of less than 12 months' duration is entitled to study leave on a pro rata basis.

Less than Full Time Trainees (LTFTs)

Less Than Full Time trainees are entitled to an annual study leave allowance 'pro-rata' to their sessional commitments. On occasion it may be necessary to extend the study leave allowance in any one year depending on the individual's training requirements. However, the allowance over the entire training programme will remain proportional to the sessional commitment.

Parental Leave

Where a doctor takes parental leave their entitlement to study leave continues, and this may be taken during 'keeping in touch' days or will otherwise accrue to be taken at a later date.

Research Trainees

Research Supervisors should ensure that funding for research includes an element for relevant study leave, including presentation of papers at national and international meetings.

LTFT trainees will have the costs of events reimbursed at the same rate as full time trainees. Academic Trainees will have equitable access to the study budget.

What are my responsibilities when planning study leave?

Trainee

- Discuss personal development plan and educational activities with named Clinical supervisor (CS)/Educational Supervisor (ES) at start of training placement and note in your Personal Development Plan (PDP)
- Complete learning agreement with ES at your induction meeting
- If you identify a relevant course or period of leave and complete the GP Specialty School study leave application form <https://www.nimdtg.gov.uk/general-practice-training/study-leave-support-and-guidance/>
The study leave application form is also available to download from the Learning Management System.

Management of Study Leave

The proposed use of study leave must be relevant to the individual's educational needs and appropriate to his or her experience. Study leave should be planned well in advance and application made at least one month ahead.

If written application is made late and insufficient time is given for approval to be considered then study leave may not be granted.

Applications for study leave must be made to the appropriate employing supervisor. During a hospital placement, the Clinical Supervisor or during a GP practice placement, the GP Trainer.

This approval does not include funding approval as this is managed centrally by NIMDTA. Where this is not known at the time of making the application, approval must be sought at a later stage.

Application Procedure

- Discuss personal development plan and educational activities with named Clinical supervisor (CS)/Educational Supervisor (ES) at start of training placement and note in your Personal Development Plan (PDP)
 - Complete learning agreement with ES at your induction meeting
1. NO RETROSPECTIVE CLAIMS WILL BE APPROVED
 2. If you identify a relevant course or period of leave, all applications for study leave must be made on the approved study leave request form which is available by download on the GP section of the NIMDTA website. All requests for study leave, regardless of whether costs are involved <https://www.nimmdta.gov.uk/general-practice-training/study-leave-support-and-guidance/>
 3. Applications must be supported by the hospital Clinical Supervisor or GP Trainer dependant on the training post at time of application
 4. Applications should be submitted to studyleave.nimmdta@hscni.net not later than 4 weeks before the date of proposed leave for the GP Study Leave Panel to approve in accordance with the policy
 5. Update your Portfolio with evidence of attendance after event
 6. If / when the application is approved then GP Trainees must make a subsequent claim for refund of any associated expenses on NIMDTA claim form. Claim forms should be returned to business.management@hscni.net within 4 weeks of the study leave event. All receipts must be attached along with a fully completed course evaluation form.
 7. Payment should usually be made within 30 days of receipt of the claim form.

All applications for study leave will be considered on an individual basis, bearing in mind the trainee's priority is to achieve a CCT in General Practice. The General Practice department reports to the GP Specialty Training Committee on all those study leave applications which have been and have not been approved. We would advise all trainees to ensure that they are covered through their indemnity provider for any study leave opportunities they may undertake. The time allocation for study leave relates to the number of working days missed over the leave period of 30 days. Weekends should only be counted when they coincide with a duty period.

What is approved for Study Leave?

- Claims for travel and subsistence connected to Regional and Locality training days may be approved. Please note that Trainees do not need to make an application for study leave to attend the Regional or Locality days
- Travel, time off or subsistence will normally be supported for examinations, which may be limited to two attempts (exam fees are not supported)
- The core GP curriculum is covered by courses organised by the Deanery, therefore any requests for attendance at external courses must deliver **in addition to the GP programme**

- Study leave is usually given to areas which will contribute significantly to service delivery e.g. Family Planning training, or a specific qualification e.g. Diploma in Mental Health, Diploma in Child Health etc.
- Provided the request is approved, Trainees may be supported with leave to attend an examination e.g. AKT and travel/subsistence costs

What is not approved for study leave?

- Enrolment on to training programmes and payment for portfolio access
- Statutory and mandatory training which should be supplied by the employers e.g. ALS and other life support courses which are not curriculum requirements – Individual applications may be considered in exceptional circumstances
- Other employer-related leave
- Professional examination fees at any point of training
- Any examination fees for standalone diplomas/certificates
- Courses for specialty examinations during GP Programme:
 - Pre-exam coaching courses will not be supported e.g. PASTEST for the AKT or SCA which are part of MRCGP
- Interview Leave
- Private Study Time
 - Taking time off to prepare for an exam is not supported through study leave in General Practice. Trainees in General Practice posts already have protected time in their weekly timetable and opportunities at locality days for self-directed learning
- Courses outside Northern Ireland will not normally be supported if they are available locally
- Study leave should not normally be granted to a doctor already holding a higher qualification in that field of study
- Retrospective study leave claims are not paid
- Consideration of value for money:

There are limitations to the amount which can be reclaimed outlined on the Trainee expenses form. Normally only one overnight stay will be approved outside Northern Ireland

 - If booking flights/ travel arrangements please remember Trainees must take advantage of the most economical options.

Mandatory Exams

Exam	Leave Time allowed (not taken from study leave allowance)	Fee reimbursement	Travel and Subsistence
AKT	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
SCA	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/> N/A
RCA	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	N/A

Specific courses for trainees requiring extra support

Individualised plans will be considered following discussions with Programme Directors.

Mandatory Courses

Exam	Leave Time allowed (not taken from study leave allowance)	Fee reimbursement	Travel and Subsistence
BLS*	Provided by NIMDTA for ST3 Trainees only	N/A	N/A
Safeguarding	Provided by NIMDTA for ST1 and ST3 Trainees	N/A	N/A

* NIMDTA provides **BLS Courses** for ST3 Trainees only; Study Leave for BLS will be supported for all other Trainees

Level 1

Non- Mandatory Highly Recommended courses for GP Trainees (apply for funding up to £750 per event – not funded if have had greater than £1250 funded in the training year)

Qualification	Information	Study leave allowance	Fee reimbursement Up to £750
European Certificate in Essential palliative care	https://www.pah.org.uk/courses/european-certificate-in-essential-palliative-care/	<input checked="" type="checkbox"/> 4 days	<input checked="" type="checkbox"/> Grant of up to £750
Post Graduate Diploma in Mental Health QUB	https://www.qub.ac.uk/courses/postgraduate-taught/mental-health-pgdip/#overview	<input checked="" type="checkbox"/> 6.5 days	<input checked="" type="checkbox"/> Grant of up to £750
