Updates from NIMDTA

Welcome!

We are delighted to welcome our new Advisor for Simulation & Quality Nicola Shanks to our Dental Team! Nicky qualified as a dentist from the University of Dundee and has over 20 years' experience working in General Dental Practice. She has been an undergraduate clinical supervisor at the Centre for Dentistry, Queen's University, for the past 7 years, a role which she thoroughly enjoys. Nicky is delighted to be a part of the NIMDTA Dental Team as Dental Advisor for Simulation and Quality and is excited about the new era of simulation training at NIMDTA.

New simulation training opportunities are planned for our postgraduate dental trainees and also for our continuing education calendar for GDPs. These sessions will teach new and innovative restorative techniques and courses will also be available to refresh manual skills for dentists who have had a career break. There are many possibilities for simulation training, watch this space!
