

LearnHSCNI for Doctors and Dentists in Training

[LearnHSCNI](#) has recently been introduced throughout HSCNI as the platform through which all staff can access training. Through the system you will be able to access mandatory and other training from NIMDTA, the Trusts and other training providers within HSCNI.

All trainees should have received emails containing logins over recent months. The majority of these were issued first to your @hscni.net email address (which had been created for you at the start of your time in training) in May and then re-issued to a personal email address we held for you in July. These emails were issued from systems.nimdtahscni.net. NIMDTA has been receiving a large volume of queries from trainees in relation to not having received logins – please ensure you have checked for emails received from systems.nimdtahscni.net since May 2023 in both your inbox and junk mail before contacting NIMDTA as in the vast majority of cases trainees have located the login details following initial contact. If you have still not been able to locate login details then you can contact systems.nimdtahscni.net for assistance.

Contained within the email are instructions in relation to how to log in also – it is essential that you select the option for “Other LearnHSCNI Login” when prompted, as described in the email, otherwise your login details will not work. You are not able to log in to your NIMDTA-provided account using your Trust email address – only the details contained in the email. Further information in relation to the new system can also be found at the links below:

While NIMDTA is responsible for the creation and maintenance of user accounts for those in its Training Programmes, and for adding the profile information which should release Encompass training to you when it starts to become available to you in your host Trust, NIMDTA is not responsible for the mapping of training to your role nor does NIMDTA schedule or run Encompass training. If Encompass Training has been released within your host Trust, NIMDTA can liaise with the Encompass Team where you should have training available but it is not present, or where the incorrect training is listed, but NIMDTA has no access to amend this. Any queries in relation to the scheduling of Encompass training, when it becomes available in your host organisation, needs to be directed to your host organisation also.
